PROFESSIONAL SUMMARY

Cybersecurity Engineering graduate (2026) with hands-on SOC L1 experience across Wazuh, Splunk, and ELK Stack, specializing in real-time alert triage, Windows Event Log and Sysmon analysis, IOC identification, and structured incident response. Skilled in building SIEM correlation rules mapped to MITRE ATT&CK, reducing false positives through threshold tuning, and reconstructing attack timelines by correlating endpoint, network, and authentication telemetry. Completed the TryHackMe SOC Level 1 path (80+ labs) with strong grounding in TCP/IP networking, firewall/IDS-IPS fundamentals, and the NIST incident-response lifecycle. Seeking a SOC/Cybersecurity Analyst role to bring production-grade detection engineering and investigation skills to a live security operations environment.

TECHNICAL SKILLS

Programming & Query Languages: SQL (log & database querying), SPL (Splunk), KQL (Kibana); working knowledge of Python, C, and PHP fundamentals

SIEM Platforms: Wazuh, Splunk, ELK Stack (Elasticsearch, Logstash, Kibana), Security Onion

Detection & Analysis: Windows Event Logs, Sysmon, Zeek, Suricata, Wireshark, Nmap, IOC Analysis

Frameworks & Methodologies: MITRE ATT&CK, Cyber Kill Chain, NIST Incident Response Lifecycle

Networking & Systems: TCP/IP, DNS, HTTP/HTTPS, SMTP, Firewall/IDS/IPS, Windows Server, Linux (Ubuntu, Kali)

Cloud Platforms: AWS, Microsoft Azure

Core Competencies: SIEM Monitoring & Triage, Log Analysis & IOC Detection, Incident Response, False Positive Reduction, Threat Hunting

SOC HANDS-ON PROJECTS

Splunk SIEM — Custom Detection Rules & Dashboard Engineering

Apr 2026

Log Analysis & Correlation Alert Development | Home Lab | [GitHub](#)

- Ingested Windows Event Logs (Security, System, PowerShell) and Sysmon data into Splunk; parsed and normalized multi-source log fields to enable cross-source correlation for endpoint threat detection.
- Built SPL correlation rules for brute-force logon detection (Event ID 4625, 10+ unsuccessful login attempts within 60 seconds) and macro-malware indicators (Event ID 4104 via Office parent processes).
- Engineered 6 dashboards tracking unsuccessful authentications, outbound anomalies, and process execution chains; tuned thresholds against known administrative activity to cut false positives by ~35%.

Wazuh SIEM — SOC L1 Simulation & Incident Response

Jan 2026

Security Monitoring & Alert Triage | Home Lab / Academic Environment

- Triageed 100+ simulated alerts in Wazuh; classified severity, validated true/false positives, and documented findings using an SOC L1 escalation framework.
- Correlated Wazuh agent, system, and authentication logs across multiple Windows and Linux endpoints to detect unauthorized access, lateral movement, and privilege escalation; mapped findings to MITRE ATT&CK (T1078, T1021, T1055).
- Executed the full incident-response lifecycle — alert receipt, triage, severity classification, documentation, and escalation reporting — aligned with the NIST incident-handling lifecycle.

ELK Stack & Security Onion — Proactive Threat Hunting

Dec 2025

Threat Detection & Log Correlation | Academic Project

- Hunted across Elasticsearch/Kibana with custom KQL queries, surfacing low-and-slow credential stuffing and abnormal process parent-child chains across multiple endpoints that automated rules missed.
- Correlated Sysmon Event IDs 1/3/10/11 with Zeek and Suricata data in Security Onion to reconstruct full attack timelines and investigate PowerShell/LSASS abuse.
- Deployed Security Onion for full-packet capture and network-level monitoring, combining IDS alerts, connection logs, and endpoint telemetry into a single detection pipeline.

CERTIFICATIONS & TRAINING

- Security Operations Center (SOC) L1 Training — Prompt InfoTech
- Ethical Hacker — Cisco Networking Academy
- C Programming — Selfmade Ninja Academy
- Deloitte Australia Cyber Job Simulation — Forage
- Mastercard Cybersecurity Job Simulation — Forage
- Ethical Hacking Fundamentals — Udemy
- TryHackMe SOC Level 1 Path (80+ labs)

EDUCATION

B.E. Computer Science & Engineering (Cyber Security)

2022 – 2026

Karpagam College of Engineering, Coimbatore, India | CGPA: 7.14 / 10
